SKILLS

Programming Languages: Ruby, JavaScript, HTML, CSS, SQL, PHP
Frameworks/Libraries: React, Ruby and Rails, Tailwind, Bootstrap
Testing: RSpec, Jest, React Testing Library
Other: Agile Development, Postgres, REST APIs, Test Driven Development, Figma, Notion, Version Control (Git)

WORK EXPERIENCE

LEARN Academy (Ruby on Rails Bootcamp)

Teaching 12-week web development courses with over 57 technical lectures in React and Ruby on Rails, utilizing industry best practices in test-driven development, version control, and project management

Lead Instructor   **February 2023 - Present**

- Instructing a total of 9 twelve-week cohorts with over 440 hours of instruction time each, totaling 173 students
- Modernized 3 key sections of the student curriculum, including mock developer experiences, React functional components, and JWT (JSON Web Tokens) integration into decoupled Rails and React applications
- Teaching and guiding students in daily activities, lectures, and coding challenges
- Mentoring and supporting Associate Instructors to enhance the quality of lectures and student interactions through daily one-on-ones
- Collaborating on syllabus documentation, resulting in increased student comprehension as evidenced by weekly assessment skill acquisition

Associate Instructor   **September 2021 - February 2023**

- Reviewed student's daily and weekly code assessments, while providing quality feedback to ensure curriculum comprehension
- Enforced industry-standard Git workflow for daily class exercises and assessments, while also identifying and resolving technical issues in student applications
- Guided students in implementing Agile methodology, creating Trello templates for project management and acting as project manager approving pull requests in full-stack projects

Webstacks - *Full Stack Software Developer Intern*   **May 2021**

- Developed a company internal portal using React, Ruby on Rails allowing employees to find and consolidate client information more easily
- Achieved over 95% test coverage using Jest and RSpec following TDD (Test Driven Development) principles

Photos Movies and More - *Digital Scanning Technician*   **June 2020 - February 2021**

- Developed and integrated new systems to streamline workflow across four different departments
- Established company-wide quality standards and improved verification process, decreasing rework and increasing profitability

Sonrise Church - *Live Sound Engineer/Audio Video Technician*   **June 2014 - July 2020**

- Implemented facilities and live event AV needs by analyzing requirements, troubleshooting, and equipment setup
- Architected production quality for both video and audio by integrating and installing new technologies and equipment

---

EDUCATION

Udemy

- Practical PHP - *by Brad Hussey, Code College*   **June 2021**
- Git: Become an Expert in Git and GitHub - *by VideoLab*   **April 2021**

LEARN Academy - *Full Stack Software Developer Student*   **February 2021 - May 2021**

- Over 480 hours of direct coding experience in React and Ruby on Rails tech stack

Grossmont College - *Graduated with Honors*   **August 2012 - June 2015**

- Associate Degree in Media Communications for Audio Production and Video Production
